AUTO EXPO Motor Show	7 - 12 February 2020, India Expo Mart
Website	www.imag.de

Market growth in India

India is a market which still offers a great deal of untapped potential for the international automotive industry. The second-most populous country in the world still only has about 25 cars per 1,000 people – compared to a global average of 155 and even 557 in Germany. However, the number of new car registrations has been increasing for some years, and in the long term India is set to become the third-largest car market in the world. The country is already way out in front when it comes to motor shows. With the AUTO EXPO Motor Show and the AUTO EXPO Components, one of the largest platforms for the automotive industry and automotive suppliers takes place every two years in New Delhi.
